

# PANELCRAFT BACK-UP PLATE

**PART NUMBERS:**  
 PC-218      PC216  
 PC-218-0    PC-216-0

## Innovative Design

- Tighter Tolerances- smoother fit
- Versatile option for either Staggered or Inline end-laps
- Four (4) dimple imprinted staggered tabs provide :
  - \* Easier and quicker installation
  - \* Positive friction installation assistance
  - \* No required clamps to hold in place while upslope panel is installed.
- No punch provides clean fastener attachment substrate.
- Wider substrate panel support at endlap/highside /ridge
- Ease of cinch strap placement – when required.
- Precision stamped parts adhere to stricter design performance tolerances.
- Galvanized G-90 material for longevity /durability
- Part flanges act as stiffener against bending for gravity loads and uplift.
- Parts available without flanges for placement onto deck or rigid insulation.
